

## **Training in Statistics/Data Analysis and Individual Six Sigma Modules**

Other training topics include Prerequisite to Six Sigma, Statistical Methods in Data Analysis, Quality & Process Control, Modeling, and Design of Experiment. For details click the links below.

1. [Statistical Applications and Data Analysis in Business and Industry I](#)
2. [Statistical Applications and Data Analysis in Business and Industry II](#)
3. [Statistical Applications using Computer: MINITAB Training](#)
4. [Statistical Methods useful in Quality Control](#)
5. [Statistical Quality Control/ Process Control](#)
6. [Statistical Quality Control/Process Control using MINITAB](#)
7. [Computerized Applications of Control Charts](#)
8. [Regression Analysis and Modeling](#)
9. [Design of Experiments \(DOE\)](#)
10. [Design of Experiment using Computers](#)
